Did you know.....information on the Yellow-headed spruce sawflies

Adult yellow-headed spruce sawflies deposit eggs into the base of spruce tree needles in spring. This insect can cause significant damage to the tree by reducing growth, killing branches and can eventually kill the tree. Some management options for the control of the yellow-headed spruce sawfly are: hand picking the insect off small trees and dispose of in a plastic bag, prune branches with larvae and dispose in a plastic bag, insecticidal soap against young larvae.

ELECTRICITY REBATE PROGRAM EXTENDED UNTIL DECEMBER

Nearly two million homes, farms and businesses will receive electricity rebates for the rest of the year to help cover high bills amid rising energy costs.

The electricity rebate program will now offer about \$600 million in relief through the rest of 2022, providing eligible Albertans with a monthly \$50 bill credit for six consecutive months.

More than 1.9 million homes, farms and small businesses will receive monthly credits on their electricity bills starting this month and stretching until the end of December, for a total of \$300 in rebates.

Quick facts

- All utility customers currently connected to the electricity system who have consumed electricity within the past calendar year, up to a maximum of 250 megawatt hours per year, are automatically eligible for the rebates.
- Consumers will receive the rebate as a credit to their electricity bills from the utility provider that provides their electricity.
- The rebate will appear as an individual line item on the electricity bill as the "GOA Utility Commodity Rebate."
- Consumers will receive \$50 each month for six consecutive months, with most rebates starting to show on July's electricity bills.
- Consumers who believe they meet the eligibility criteria but have not received the rebates by the end of July should contact the Utility Consumer Advocate at 310-4822 or UCAhelps@gov.ab.ca for assistance.
